RE: Harvesting of blue gums

We are writing to you to thank you for the way in which you professionally conducted your services during, before and after the harvest of our blue gums.

When first approached about the harvesting of our blue gums you and your company were honest and upfront about the pro's and con's in regards to harvesting. You gave us a well set out budget estimate for the tonnes that were likely to be on our property and you estimate turned out to be on target with the production that came off.

As we operate as a family concern you made yourself available to all involved with information and no question was too hard for you. The communication between parties was constant during the process.

The contractors which you employed (Bluewood) were professional in the way they operated, they did a fantastic job, the staff were very approachable and went about their jobs without disrupting the running of the farm.

We would have no hesitation in recommending you for harvesting of bluegums.

Thanking you

Wayne Sandra and Natalie Meade
